## Service is our strength!

The decentralised service-network takes care of about 1000 customers in Europe. Experienced service engineers support our customers from six service locations in an efficient and competent manner. Due to our well-equipped depot, we have most spares in stock and can therefore usually guarantee instant replacement. The service areas are overlapping. If necessary, the decentralised service is supported from within the headquarter in Dortmund.

### 1. Head Office Dortmund / Benelux
